

Create an abstract collage portrait

the
point.

Cut out the coloured shapes and glue to the face shape to make your very own Picasso and Matisse inspired abstract collage portrait. As it is an abstract shape, there are no rules. You can even use old magazines and leaflets and create your own shapes. For the small circles use a hole puncher to create them.

Self portrait or friend?

TIP!

If you want to use different shapes, take a pair of scissors and cut shapes out of coloured paper or magazines without drawing them first - just like Matisse did!

CUT OUT!

Use old magazines, leaflets, packaging to make these shapes - anything with bright and interesting colours
